**NUTRITIONAL SCIENCES MINOR PROGRAM
INFORMATION SHEET**

Students wanting a foundation in nutrition are encouraged to consider the Minor in Nutritional Science. Students must be eligible for third-year standing with a cumulative average of at least 68% in the previous two years, and **must have completed FNH 250**. Enrolment in this program is strictly limited. Application forms may be obtained from the Advising Centre. Completed applications must be returned no later than May 15. Upon successful completion of this program, the notation Minor in Nutritional Science will be placed on the student's transcript. The program will consist of FNH 350, 351; and 12 credits from FNH 301 355, 370, 371, 402, 451, 470, 473, and 490.

Note: Students who pursue a Minor in Nutritional Science should be aware of the prerequisites for many of the upper level courses in Food, Nutrition and Health. Students may encounter difficulty fitting the FNH courses into their program timetable; careful planning is essential.

Note: Students who wish to pursue further studies in the Faculty of Education should be aware that courses which are acceptable for a Nutritional Science Minor may not necessarily meet the requirements for a teaching concentration in the Faculty of Education. Students planning to enter the Teacher Education Program in the Faculty of Education need to review the detailed admission requirements at www.educ.ubc.ca/teacher_ed/bachelor.html. Students planning to apply for the secondary option must prepare a second teaching field.

Applicants will be informed by email in mid-June if they have been selected for the minor program, or placed on a waiting list, or have not qualified for either the minor program or the waiting list.

Before you apply, ensure that your 3rd and 4th year program requirements do not conflict with the minor.

Application deadline is May 16th, 3:30pm at the HKIN Advising Office
